

QUATRO G3

by MadencieFx. Metatrader 4 Expert Advisor.

Live Signal Account: <https://www.mql5.com/en/signals/2183554>

Quatro G3 - the profitable Forex Trading Bot for MetaTrader 4.
Unlock Consistent Growth with Advanced Algorithmic Trading.

Why Choose Quatro G3?

Proven Performance

Quatro G3 has been running profitably for a long time.

No Stop Loss Strategy

A calculated risk approach to maximize growth. Quatro G3 picks very discerning trades and opportunities that have a high probability of going into profit and closing within 1 hour.

Otherwise, the bot waits till the trade comes around to profit. Smart Trade Execution – Uses sophisticated algorithms to enter the most profitable trades.

USD Account Compatible

Specifically designed to grow USD-based trading accounts.

Optimized for Forex – Profitable at trading all regular forex currency pairs (no indices, commodities, crypto, or metals). The 28 forex pairs from crosses of the majors are most recommended (any AUD, CAD, CHF, EUR, GBP, JPY, NZD, or USD combination)

Quatro G3's 12 Best Trading Pairs

These 12 have been the most profitable in the long term.

EURJPY, CHFJPY, GBPJPY, GBPUSD, CADJPY, GBPCAD, EURNZD, USDJPY, EURAUD, AUDCAD, USDCAD, GBPAUD.

Quatro G3 adapts to market conditions using intelligent trade selection, ensuring high success rates on major forex pairs. Whether you're a seasoned trader or just starting, Quatro G3 provides a hands-free trading experience with maximum profit potential.

Drop Quatro G3 on any chart you want it to trade, and decide on **only 2 settings**:
Lot size of each trade and the number of simultaneous trades the account should allow.

Quatro G3 does not open more than one trade per currency.

Quatro G3 does hedge or use martingale strategies.

We recommend dropping Quatro G3 on 10 to 28 different currency M15 charts in one MT4 account, with the same exact settings of lot size and max number of simultaneous trades for each chart/bot, and running this trading setup on a VPS.

Some directions

Use Quatro G3 on M15 currency charts only.

Please don't mix Quatro G3-traded currencies with other bots in the same account.

Let Quatro G3 be the only bot trading in the MT4 account, since sometimes it collectively closes all trades at a healthy profit point.

The recommended number for Maximum Number of trades is between 3 and 7.
4 or 5 is ideal.

For each Metatrader 4 account, use the same settings for each instance of the bot you put on a currency chart. Keep the lot size and maximum number of trades the same for each chart, regardless of if you're putting it on 3 charts or 28 charts.

Quatro G3 is programmed to work on Metatrader 4 U.S. Dollar accounts.
Quatro G3 can work on accounts of any leverage, but has only been used and tested only on accounts of leverage between 1:50 and 1:500.

A general guide on lot sizes and maximum number of trades:

For the most generalized recommendation (for leverage between 1:50 and 1:500),
we recommend giving each 0.01 lot at least \$110 USD.

If your account balance is \$500 USD,
We recommend not opening a total of more than four 0.01 lot trades in that account.

If your account balance is \$2000 USD,
You can open 9 trades of size 0.02 lots each,
Or 6 trades of size 0.03 lots each for the entire account.

If your account balance is \$10,000,
You can open 9 trades of 0.1 lots each,
Or 5 trades of size 0.18 lots each for the entire account.

This is a general-purpose helpful recommendation for long-term, profitable trading. This guide will help you avoid margin calls/stop-outs, and be safe at times of sudden massive price swings.

About our live signal account

Our live signal account runs on a MQL VPS and has a setting of at most 2 trades at once. The goal of this account is simplicity and consistency, to show how Quatro G3 trades profitably over time. This is why we haven't changed the lot size or maximum number of trades.

The settings are:

Maximum number of trades: 2

Lot size per trade: 0.01

How to start

We recommend you start Quatro G3 using our lot size recommendations, or use even more conservative settings than \$110 USD per 0.01 lot.
